

36L floor standing three flavor Product Number: MK36C

Ice cream machine description :

Model No.:MK36C

Production :36L/H

Compressor:Panasonic

Voltage:220v/50hz/60hz

Power :2400w

Gas:R22/R410a

Size:715*560*1380mm

Noise:48db

Ice cream temp can be -7 to -8 celse degree

Powerful Technology and Spare Parts Used

1.compressor:panasonic

2.condensor:full copper condenser with two inlet connector for anti-shake

3.motor:famous motor applied by most factories in china

4.gear box :strong cast iron gear box with metal gears (most Chinese factories use plastic gears)

5.capillary:full copper capillary

6.hopper:#304 stainless steel hopper without welding (some factories use plastic hopper and do welding on hopper)

7.outside design: painted in one color or full stainless steel

8:inner side: painted with black color (some factories not painted inside with only raw material)

9:handle:with rubber inside holes for noise cutting

10:discharger block: with a slide angle for strengthening and crack protection

11.mother board and displayer: mother board is a matured chips design which used for more than 10 years ,all information can be displayed on like cones ,temp, shift ,trouble-shooting etc

12.anti-break copper design inside

13.anti-shake screw holder on side board

Package and Shipping

1. wooden base plus carton box

2. wooden crate (with extra packing charge)

3.sea shipment or air cargo

FCL: full container load recommended for transportation

LCL: less than container load ,must take care and with shipping mark

After Sales Service

1.with 1% total container value spare parts sent together with shipmen

2.additional spare parts charged with factory cost

3.all cooperation based on long time contract
