How to  
make toast

# Catering Pop-Up toaster

## Unique patented ProHeat® elements:

Exclusive to Dualit, ProHeat elements have a protective **armour plated** layer covering the filament making them virtually unbreakable

## Pop-Up:

It couldn't be simpler: drop in the bread and lower the lever. The toast will automatically pop-up, browned to perfection, when ready

## Replaceable parts:

Designed for continual, day in, day out use. However, if wear and tear eventually take their toll, virtually **every part** can be **replaced**

## Build quality:

Built to the highest standards. With a weighty 7.5Kg stainless steel body, it is designed specifically for commercial use

## Intelligent browning:

Set the browning control for a specific bread; the toaster then auto-adjusts the time to ensure consistent browning from the first to last slice. Spring-loaded slots centre the bread for even browning on both sides

## Flexible:

Wide, 30mm slots allow for the chunkiest bread

## Simplicity itself:

Virtually foolproof, Dualit's new electronic browning control is designed to minimise the guess work and produce consistently great results every time. Making the Catering Pop-Up toaster perfect for self-service buffet areas

## Reliable:

Rigorous endurance testing and regular Dualit 'crunch' tests ensure that convenience and simplicity never compromise reliability and toast quality
