## OMEGA JUICERS

2009 QUALITY AWARD

The Omega Juicer model J8226 is the most effective single gear masticating juice extractor on the market today. Designed and engineered for health-conscious people who want greater variety in their juicing routine, the Omega J8226 Juicer has the ability to juice everything from fruits and vegetables to wheatgrass.

The auger of the Omega Juicer turns at a low 80 RPMs to ensure the maximum amount of enzymes, vitamins and minerals are captured during the juicing process. This low speed helps the Omega J8226 Juicer foams less than a double gear style juicer. This heavy-duty juicer features a patented, stone mill-like screw, made of GE's ULTEM material, which is 8 times stronger than augers on other single auger juicers.

### **The Omega Juicer has multiple uses:**

- Baby Foods
- Fruit Juicer
- Frozen Dessert Maker
- Grinding
- Mincing/Chopping
- Soy Milk Extruder
- Vegetable Juicer
- Wheat Grass Juicer
