Premium pleasure.
The **Saeco** Primea Line.

Ideas with Passion

With **Saeco** everyday feels like a sunday.

Created by true lovers of coffee, our fully automatic coffee machines make every cup a luscious experience. Since the beginning over 20 years ago Saeco has constantly been creating innovations to bring you the most intense taste experience in the most convenient way – so you can simply relax and enjoy.

Freshly ground beans, perfectly foamed milk and an integrated water filter guarantee pure coffee enjoyment – and all it takes is the push of a button. Enjoy that exquisitely peaceful Sunday feeling every time you take a sip.

The **Saeco** Freshness Promise.

We have placed a renewed focus on the fundamental elements of excellent coffee – creating ideas that will elevate your enjoyment to a new dimension.

The first dimension: fresh beans for every cup. For each cup whole coffee beans are freshly ground to achieve a truly authentic coffee taste.

The second dimension: crystal clear water for the brewing process. Only in perfectly pure water the beans' aroma can fully unfold – that's why every Saeco is equipped with a water filter by world market leader Brita.

The third dimension: special treatment for our milk. With the Milk Island, Touch2Cappuccino and Pannarello milk froth dreams come true.

To us it is the Saeco Freshness Promise. To you it is a new dimension of enjoyment.

The world of **Primea**.

If you are looking to settle down in a world of premium quality, the latest innovations and exclusive design, the Primea line is the ideal choice for you. These fully automatic coffee machines offer every connoisseur the best in every area including – of course – taste. Ultimately convenient in every respect, all machines are made to meet the highest demands and to ensure unique enjoyment.

Always just right – the **Saeco** Adapting System.

With this new feature our machines can automatically adjust to every kind of coffee bean to guarantee the ideal amount of ground coffee is used every time. Because only the exactly right dose allows the coffee's aroma to completely unfold. After preparing just a few cups, the Saeco Adapting System has already adjusted to your coffee beans – and you enjoy an even more intense coffee experience.

Primea Touch Plus

Primea Ring Plus

The **luxury** of pure taste.

Primea Touch Plus

If you appreciate the comfort of a colour touch-screen display the Primea Touch Plus is your model. Design enthusiasts will also be delighted by its elegant Black/Silver colouring. Features such as Touch2Cappuccino, Saeco Brewing System SBS, Touch Lift and the pre-heated cup surface make the Primea Touch Plus a true marvel.

Primea Ring Plus

Operated via its convenient Click Wheel Interface the Primea Ring Plus is a pleasure to handle – and with its Anthracite/Silver housing it is also a feast for the eye. Topped off by features like Touch2Cappuccino, Saeco Brewing System SBS, Touch Lift and the pre-heated cup surface it is simply a superb choice.

Enjoy the finest of **features**.

The Saeco Primea line is premium down to its last little detail. No matter from what angle you look at it, all you will find is the best of the best – and that is just what you will experience with every cup.

Whole beans For each and every cup whole beans are ground. This guarantees you fresh coffee enjoyment with every sip.

Touch-screen display and Tip-Ring Whether our machines feature a touch-screen or a Tip-Ring, everything is designed for convenient handling. All interfaces make every coffee a touching experience.

Touch²Cappuccino A Saeco-unique functionality for the convenient parallel preparation of two cappuccinos. Here the milk is stored inside the machine.

Saeco Brewing System SBS This is best described as a stainless magic jewel. Simply by turning the knob you can prepare any kind of coffee exactly according to your taste: mild or strong and anything in between.

Auto Rinsing System This feature does virtually all the cleaning for you. With one touch and the machines in our Primea line automatically draw water out of the tank and rinse all parts that come into contact with milk.

Touch Lift The electronically adjustable drip tray is a kind of magic. All you need to do is touch the button to choose the ideal position for every kind of cup or glass.

Pre-heated cup surface This handy feature allows you to comfortably store your cups and at the same time pre-heats them so the coffee aroma can fully unfold.

Energy Safe When your Saeco is idle for a while Energy Safe is automatically activated. The machine is set on stand-by to run even more economically.
