Your life – your **Saeco**.

Ideas with Passion

 **Saeco**

A new dimension
of **enjoyment.**

The pinnacle of enjoyment starts at its very origin. That's why we've placed a renewed focus on the fundamental elements of excellent coffee – infusing our new ideas with our passion for what we do. Ideas that will elevate your enjoyment to a new dimension – that will once again rekindle your love for coffee. More aroma, more purity, more freshness. In each and every cup.

To us it is the Saeco Freshness Promise.

To your customers it is a new dimension of enjoyment.

**The first
dimension:
More aroma
per bean.**

The focus of our ideas lies with the coffee bean. With creativity and precision we elicit from this little marvel of nature every ounce of its aroma. That's why Saeco is synonymous with state-of-the-art technology conjuring up the most intensive of tastes – an invitation for everybody to join the world of supreme coffee enjoyment.

**The second
dimension:
Crystal clear
water for
the brewing
process.**

There's tap water – and then there's tap water. Bearing this in mind Saeco also pays concentrated attention to this precious resource. As the world market leader we trust a partner of equal competence: Brita, the world's number 1 in water filtration. Through this partnership every cup tastes harmoniously well rounded.

**The third
dimension:
Special treat-
ment for our
milk.**

Fresh milk and creamy froth are the coronation of coffee. So we dedicated all our passion to this pleasure and developed three milk froth concepts ranging from classical to revolutionary. With Milk Island, Touch2Cappuccino and Pannarello you can individually and freshly make your milk froth dreams come true.

Just what **you** need.

Coffee lovers are individualists. Every one has his or her own preferences, affinities and needs – so do you. That's why we would like to assist you in deciding which Saeco is the perfect one for you.

Xsmall

What kind of coffee specialties would you mainly like to prepare with your new Saeco?

☐ I am a purist – espresso is my favourite.

What's your favourite way of preparing milk froth?

☐ A simple but effective steam nozzle would be fine.

Which machine assets – apart from great espresso – are most important to you?

☐ I don't have much space to spare so I need something compact.

What kind of user interface do you prefer?

☐ Tip-ring with digital display – great.

What colours would suit your needs?

☐ My favourites range from minimalist simplicity to strong contrasts.

Take just a moment to answer the following questions and you'll find the fully automatic coffee machine of your dreams.

Odea	Talea	Primea
<input type="radio"/> I enjoy espresso, but I also really like milk froth specialties.	<input type="radio"/> I can't get enough of my milk froth!	<input type="radio"/> Espresso, latte macchiato and cappuccino – but always in pairs.
<input type="radio"/> Manually, with the aid of a classic pannarello.	<input type="radio"/> I dream of a separate glass carafe for my milk froth that I can store in my fridge over night.	<input type="radio"/> With the push of a button, right into the cup.
<input type="radio"/> It should be easy to use and highly functional at the same time.	<input type="radio"/> I want a versatile machine with which I can prepare milk froth specialties really quickly.	<input type="radio"/> For me it has to be the best of the best with premium design and the latest technology.
<input type="radio"/> The rotary chrome knob with indicator lamps sounds perfect.	<input type="radio"/> The tip-ring with digital display is my favourite.	<input type="radio"/> I need the ultimate convenience of a touch-screen-display.
<input type="radio"/> Either discreet elegance or eye-catchingly colourful.	<input type="radio"/> Noble metallic tones would fit my kitchen perfectly.	<input type="radio"/> I have an affinity to classic colours with a hint of extravagance.

Choose your favourite.

We hope our little questionnaire was helpful to you. Compare your answers to our four different lines and you will find the fully automatic coffee machines of your dreams.

Xsmall Line

The most basic line of Saeco fully automatic coffee machines. With front access to all features and compact design it only requires a minimum of space.
349€ - 399€

Odea Line

The Saeco Odea models combine advanced features and inviting design. The pannarello allows easy manual milk frothing.
399€ - 499€

Talea Touch Plus

Primea Duo

Talea Line

For true milk froth fans the Talea is the perfect match. With the attachable Milk Island it is the quickest and most convenient way to creamy milk froth.
649€ – 949€ excluding Milk Island

Primea Line

If you are looking for premium in every respect, the latest innovations and exclusive design, the Primea is the ideal choice for you.
1099€ – 1399€

Primea Duo

Saeco **Primea** Line

The Primea Cappuccino fully automatic coffee machines offer every connoisseur the best in technology, design and – of course – taste. Functional from every angle, all machines are made to meet the highest demands and to ensure unique enjoyment.

Duo Grinding System

Two independent grinding systems allow you to create your very personal blend of two different sorts of coffee beans.

Touch² cappuccino

A Saeco-unique fantastic functionality for the convenient parallel preparation of two cappuccino. In this coffee concept the milk is stored inside the machine.

Primea Touch Plus

Primea Ring Plus

Touch-Screen Display and Tip-Ring

A user-friendly interface. Whether our machines feature a touch screen or a ring: Everything is designed for convenient handling. All interfaces make every coffee a touching experience.

Touch Lift

The electrically adjustable drip tray is a kind of magic. All you need to do is touch the sensitive button to choose the ideal position for every kind of cup or glass.

Talea Touch

Talea Ring Plus

Saeco **Talea** Line

Milk froth fans couldn't be happier that with the Saeco Talea – thanks to its unique Milk Island. More highlights like contemporary design, superb usability and Touch Lift make it a truly great choice.

Milk Island

The Milk Island is a unique innovation. In fact it is the key function for all milk froth fans. Whether you prefer Espresso Macchiato, Cappuccino, Latte Macchiato or any other specialty based on milk, the preparation of creamy foam is just a matter of seconds.

Talea Ring

Talea Giro

Drip Tray

For your convenience you can change the height of the drip tray. With this functionality you always have the cup right below the coffee outlet.

User-friendly Interface

The Talea Line uses three different interfaces: Touch-Screen display, the rotary knob with indicator lamps and tip-ring with digital display. Yet they all have one thing in common: supreme usability.

Odea Giro Plus

Odea Giro

Saeco **Odea** Line

Welcome to a delight ahead of time: The Odea Line is characterised by a new touch of purity. Inviting ergonomics and accentual colours create a visionary design matched by its convincing features.

User-friendly Interface

Rotary chrome knob and indicator lamps give the interface supreme usability with a stylish appearance. With this interface everything works just beautifully.

Odea Giro

Odea Go

Ergonomic Design

Inviting ergonomics and accentual colours create a visionary design to please all coffee epicures who prefer a sovereign style.

Drip Tray

For your convenience you can change the height of the drip tray. With this functionality you always have the cup right below the coffee outlet.

Steam

Die **Xsmall** Linie

The newest and most compact member of the Saeco family is an astounding piece of design and functionality. It's ideal for every desired espresso specialty – creamy milk froth is also prepared with ease.

Userfriendly Interface

The Xsmall offers great convenience: To enjoy a perfect espresso it only takes the turn of a button.

**Xsmall
Plus**

Easy to clean

The drip tray can easily be pulled out of the machine's front – making its cleaning a child's play.

**Fresh and
Compact**

Everything is operated on the machine's front, enabling this compact masterpiece to fit in narrow spaces and supply even the smallest kitchen with great taste.

General **Saeco** features

To ensure great taste, easy maintenance and longevity for every Saeco line, all models are equipped with a standard package of unique features. Here is a quick and impressive overview.

SBS

This is best described as a chromed stainless-steel jewel. Simply by turning the knob you can prepare any kind of coffee exactly according to your taste: mild or strong and anything in between.

User-friendly Interface

From touch-screen to the Tip-Ring to the rotary knob: Every Saeco user interface is designed for convenient handling, making every coffee a touching experience.

Brewing Group

To easily clean one of the most essential elements of the machine, it can be removed within just a few seconds.

Saeco Adapting System

The automatic adjustment to every kind of bean guarantees the ideal amount of ground coffee – and intense taste.
