Fresh filter coffee, brewed of course, by the quick filtering machines of Bravilor Bonamat! The range of machines enables you to serve delicious fresh coffee, quickly and simply in any location. The high-quality stainless steel in combination with black accents provide a contemporary design. LED controlled operation, stainless steel filter pan and integral hot plates make our machines easy to use. Operation and maintenance require little time. Signals indicate when the coffee is ready and when the machine should be descaled.

◀ The Mondo-series and TH can be filled with water from the front of the machine. Convenient and safe!

■ Mondo-series

Mondo 2

- Features a manual fill water system allowing the machine to be placed anywhere
- A signal indicates whether the machine is filled with water
- Two self-regulating hot plates ensure an optimum coffee quality

Mondo Twin

- Quickly brews large quantities of coffee thanks to the double brewing system
- Features a manual fill water system allowing the machine to be placed anywhere
- A signal indicates whether the machine is filled with water
- Four self-regulating hot plates ensure an optimum coffee quality

◀ Self-regulating hot plates. Both hot plates of the HP can be switched on or off independently.

■ Matic-series

Matic 2

- Automatic water fill model with quick and easy connection to the water mains supply
- Coffee of consistent quality by accurate water dosing
- Two self-regulating hot plates ensure an optimum coffee quality

Matic Twin

- Quickly brews large quantities of coffee thanks to the double brewing system
- Automatic water fill model with quick and easy connection to the water mains supply
- Coffee of consistent quality by accurate water dosing
- Four self-regulating hot plates ensure an optimum coffee quality

TH

- Features a manual fill water system allowing the machine to be placed anywhere
- A signal indicates whether the machine is filled with water
- Brews coffee directly into airpot or vacuum container

THa

- Automatic water fill model with quick and easy connection to the water mains supply
- Coffee of consistent quality by accurate water dosing
- Brews coffee directly into airpot or vacuum container

◀ The airpot Fureto and the Advanta vacuum container are specifically designed to preserve an optimal coffee quality for long periods of time.

◀ Multi-usable Airpot station. A base for two airpots, accessories and ingredients. Ideal for a functional and attractive presentation.

Hot water and milk heaters

Large quantities quickly at the right temperature

The taste of quality worldwide

■ **RLX-series**

HWA 40/70

- Large quantities of water (4/7 litres) quickly at the right temperature
- Automatic water fill model with quick and easy connection to the water mains supply
- Cup or decanter hot water at the press of a button or a variable volume via the free flow key
- Simple programming for temperature and the water volumes (cup/decanter)
- The indicator light indicates when the water is at the right temperature
- Equipped with a descale indicator

RLX 3

- Water (1.8 litres) quickly at the right temperature
- Automatic water fill model with quick and easy connection to the water mains supply
- Simple programming of water temperature
- Equipped with a descale indicator

RLX 4

- Machine for hot water and steam
- Water (1.5 litres) quickly at the right temperature
- Automatic water fill model with quick and easy connection to the water mains supply
- Equipped with a descale indicator

◀ HWA 40/70 choice of cup, decanter or a variable amount with the free-flow key.

◀ RLX 3/4 also available as an integrated module within the RLX coffee range.

■ HW 500-series

HW 505/510/520

- Large quantities of water (4/8/16 litres) quickly at the right temperature
- Features a manual fill water system allowing the machine to be placed anywhere
- The required temperature can be regulated by means of a thermostat
- The indicator light indicates when the water is at the right temperature
- Gauge glass provides a visible water level

HW+ 510/520

- Large quantities of water (8/16 litres) quickly at the right temperature
- Machines with quick and easy connection to the water mains supply and filled with water at the press of a button
- The required temperature can be regulated by means of a thermostat
- The indicator light indicates when the water is at the right temperature
- Gauge glass provides a visible water level

◀ A quick tapping tube can be used for filling cups and decanters (for HW(+) series only).

◀ Water temperature can be regulated by means of a thermostat. The indicator light indicates when the contents is at the right temperature.

■ HM-series

HM 505/510/520

- Large quantities of milk (5/10/20 litres) quickly at the right temperature
- Heats the milk using the bain-marie method, preventing burning or sticking
- The required temperature can be regulated by means of a thermostat
- Gauge glass provides a visible water level in the bain-marie system

■ HCM

HCM 510

- Large quantities of chocolate milk (10 litres) quickly at the right temperature
- Heats the chocolate milk according to the bain-marie method, preventing burning or sticking
- The required temperature can be regulated by means of a thermostat
- Gauge glass provides a visible water level in the bain-marie system

◀ The cup heater WHK preheats cups and mugs, ensuring the beverage stays warm longer after serving.

◀ The stainless steel vacuum flask keeps your beverage hot or cold for long periods.

Round filter

The taste of quality worldwide

Do you require large quantities of delicious fresh coffee, brewed quickly? Then Bravorio Bonamat's round filtering machines are the solution. The range is ideal for busy periods where high volumes of coffee are demanded, such as theatre intervals or hospital canteens. The containers can be placed in almost any location with ease allowing coffee to be served at any moment wherever you wish. The machines come equipped with user friendly programming and in an attractive design: the robust stainless steel appearance confirming the quality of this equipment.

The convenient control panel with LCD display makes it easy to adjust and read settings.

Round filtering machines highlighted

- Delicious fresh filter coffee
- Ideal for sites requiring large quantities of coffee brewed quickly
- Stainless steel filter pan and housing for a robust and quality appearance
- Individual containers that are easily transported for coffee to be served locally
- "Coffee is ready" signal
- Variety of serving sizes: by the cup, decanter, litre or gallon
- Total and daily counters
- Descaling system
- Built-in timer so coffee can be brewed while you are absent from the machinery
- Adjustable brewing time for optimum extraction
- Optimum safety mechanisms: container and vessel air signal
- A variety of models available to suit every situation

A wide range of stackable containers. Each has a double wall, gauge glass and non-drip tap. Also available with double tap as an insulated model and as tea container.

Rio
International

B-series B HW-series

The round filter machine is also available as a single model with one container and one brewing column. Additionally it is possible to construct machines for a greater capacity, for example a double or triple capacity model.

The machine is easy to fix to the wall.
The coffee can be made at a central
location and poured anywhere in the
building. Serving trolleys transport the
containers effortlessly.

Super Jolly

Saeco Royal Line

Royal Line

Versatile, durable, generous – the models of the Royal Line turn big offices as well as your home into a kingdom.

Durable housing

With a durable housing made of high-quality metal, generous containers for water, beans and coffee grounds the Royal Line is suitable to prepare large amounts of coffee every day.

Cappuccinatore

This handy feature draws the milk directly from the bag and converts it to creamy froth – directly into the cup.

Royal Cappuccino

The line's top model is a noble choice – for big offices as well as for your home. One of its main assets is Instant: Two separate heating systems enable the simultaneous preparation of coffee and milk froth. Adding its cappuccinatore the Royal Cappuccino will delight all milk froth fans.

- Instant-Steam • Cappuccinatore • Pre-heated cup surface • Additional compartment for ground coffee
- Opti-Dose • Simultaneous preparation of two cups • Auto Service Programme

Royal Professional

This fully automatic coffee machine is perfect for milk froth enthusiasts who can't wait to enjoy their next cup: With Rapid Steam steam for frothing up milk is available with no waiting at all. The cappuccinatore and its kingly silver housing top off this pro model.

- Rapid Steam • Cappuccinatore • Pre-heated cup surface • Additional compartment for ground coffee
- Opti-Dose • Simultaneous preparation of two cups • Auto Service Programme
